BUSINESS INTELLIGENCE SPECIALIST- INTERN

I worked on big database.

ON BIG DATABASE;

- Data Select
- Arithmetic Operators and Functions
- Table Join
- Subquery

PROJECTS

- PERSONAL LESSON SCHEDULE

This project makes calculations under the subject headings in addition to the total net account of the test results.
As a result of the calculation, the subject that the student failed is determined. One-to-one lesson assignments are made automatically by comparing the free time in the weekly schedules of the registered teacher and student.
